

The Sancy gates

Name : The Sancy gates
Name of location : Chastreix
Owner : Public

GPS :
Latitude : 45.531496
Longitude : 2.817235
Altitude : 1 680 meters

Access by car : in Chastreix, take the direction of Chastreix-Sancy. Park at the last car park at the top of the station.

Length of itinerary : 45 minutes walk from the public parking

Location of artwork : Small valley under the ridges.

Description of the site :

The proposed site is located just under the ridges, at the top of the Chastreix-Sancy slopes but it already offers a view of the ridges and Sancy est and the rock of Courland and far away the Limousin to the west. Low altitude vegetation with some rocks covers the ground. The installation site is quite large.

Technical features of the site :

A track allows a 4X4 vehicle to reach a few tens of meters from the site. The winds are frequent and can be very violent and the weather can become extreme (storm, fog, cold even in summer). The anchoring of the artwork and its taking wind will therefore be particularly studied. The site being located in extreme border of the National Natural reserve of Chastreix-Sancy, a particular care will be carried on the choice of the materials and generally on the minimum impact of the work on the site.

Best point : A site with incredible views both on the ridges and the Sancy and full west towards the Limousin, located on a path to the summit of Sancy less known than the one climbing Mont-Dore via the Val de Courre.

The peak on the left is named
The Roc de Courlande

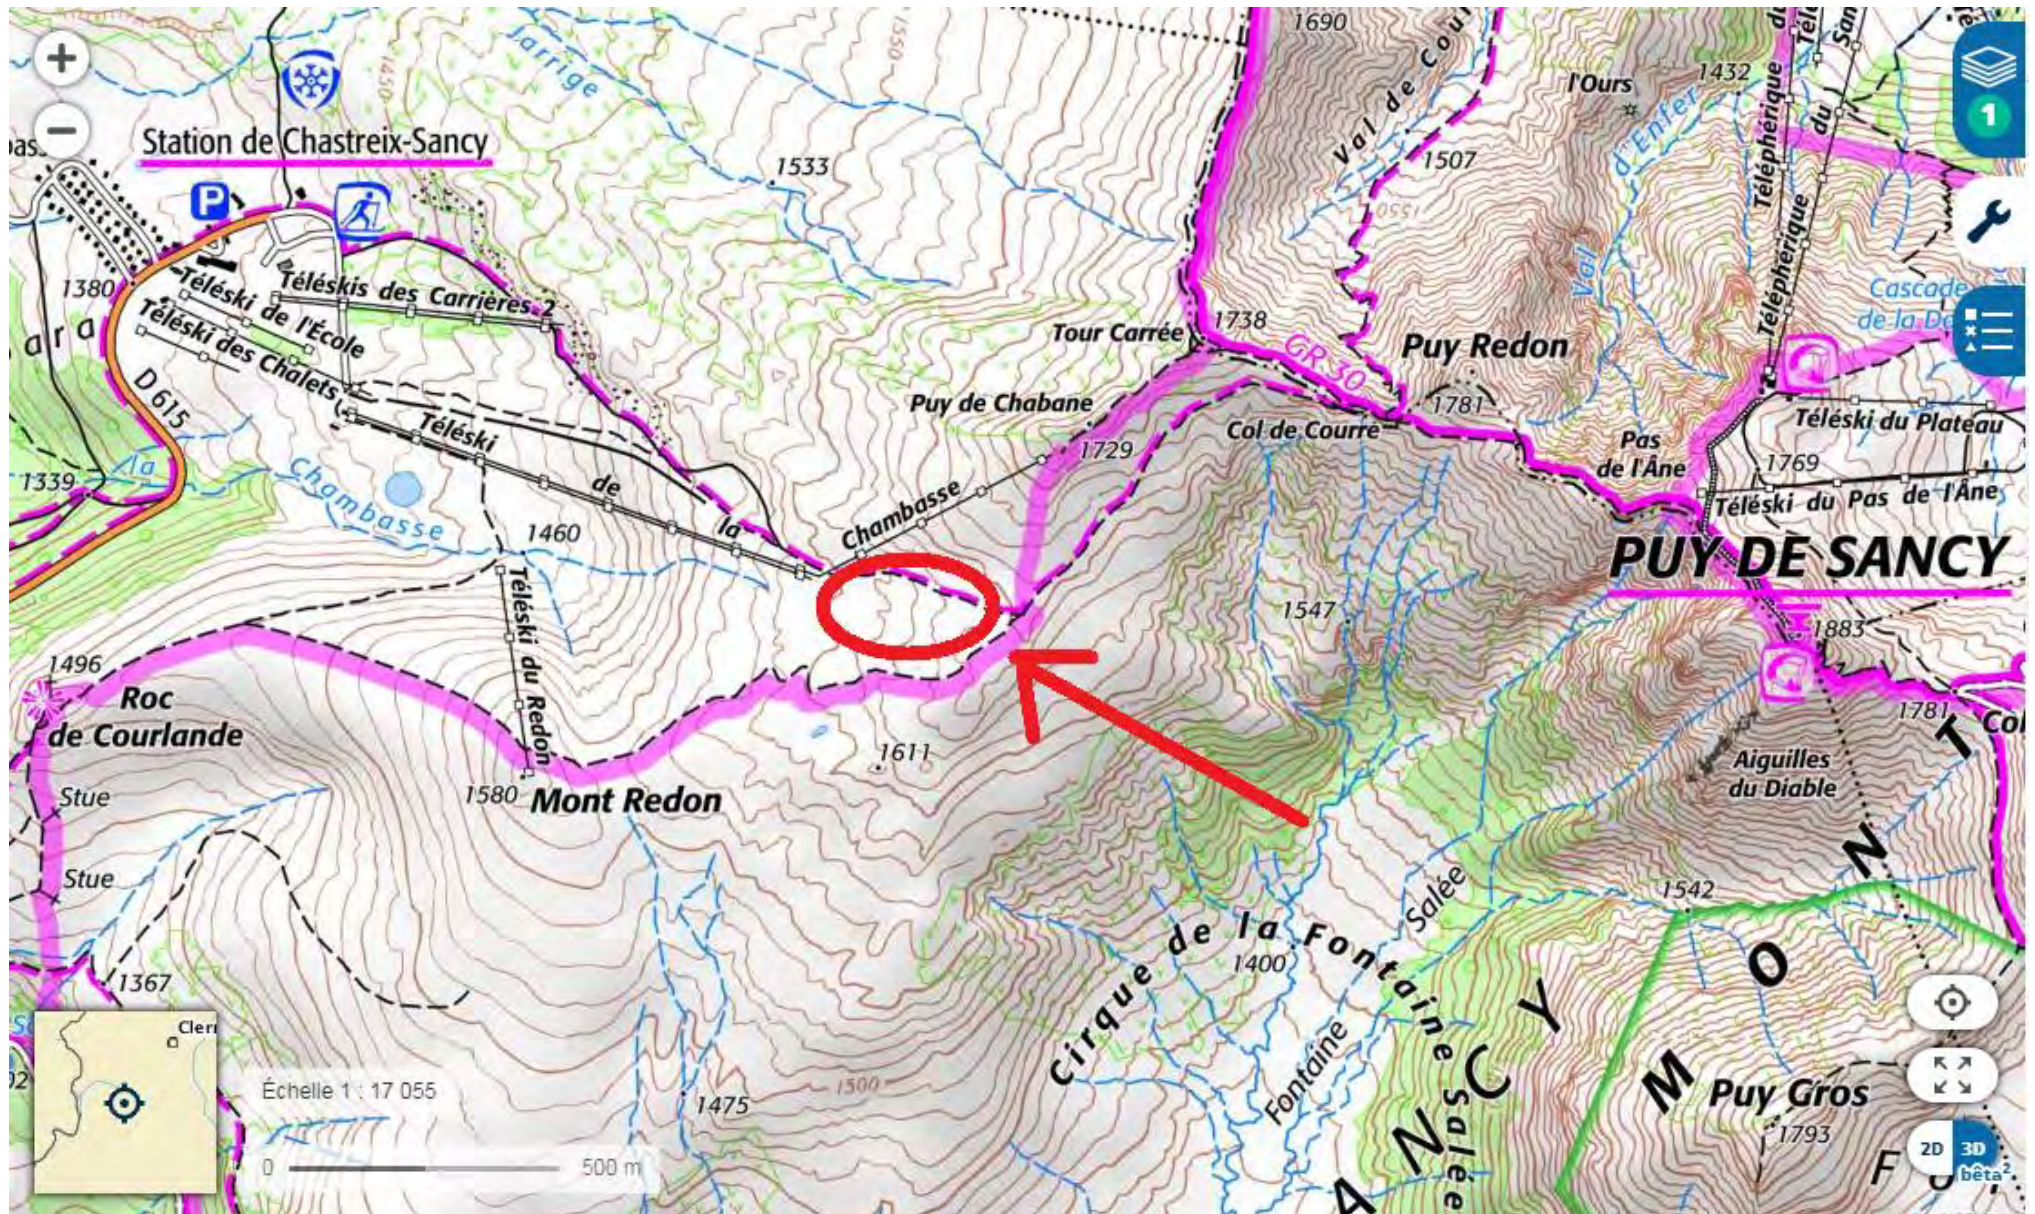

Point of view on the Sancy marking the entrance to the reserve

The site seen from the foot of the Roc de Courlande
