

# La Montille

**Name :** La Montille

**Name of location :** Le Mont-Dore

**Owner :** Public

**GPS :**

Latitude : 45.598107

Longitude : 2.799335

Altitude : 1360 meters

**Access by car :** From the center of Mont-Dore, take the road to the Col de la Croix Morand, then to Lake Guéry. At the Auberge du Lac, take the road to the left and park after the bridge.

**Length of itinerary :** On foot 1h30 round trip.

**Location of artwork :** Unnamed peak overlooking the Valley, above the 2 burons of the parcel Les Montilles.

**Description of the site :**

The proposed site is an unnamed peak overlooking a meadow of pastures (presence of cows) including 2 burons, bordered by a hiking trail at the foot of Puy Gros. This peak has a plateau of about 8000m<sup>2</sup>, dotted with rocks. It overlooks Mont-Dore and offers a panorama of the entire Sancy Massif.

This peak is located on the edge of the Guéry plateau, desert plateau at 1300 meters altitude dedicated to the summer past over Lake Guéry, presenting the appearance of Mongolian steppe or African savannah. This plateau is bordered by Banne d'Ordanche and Puy Gros, two emblematic peaks of the Massif.

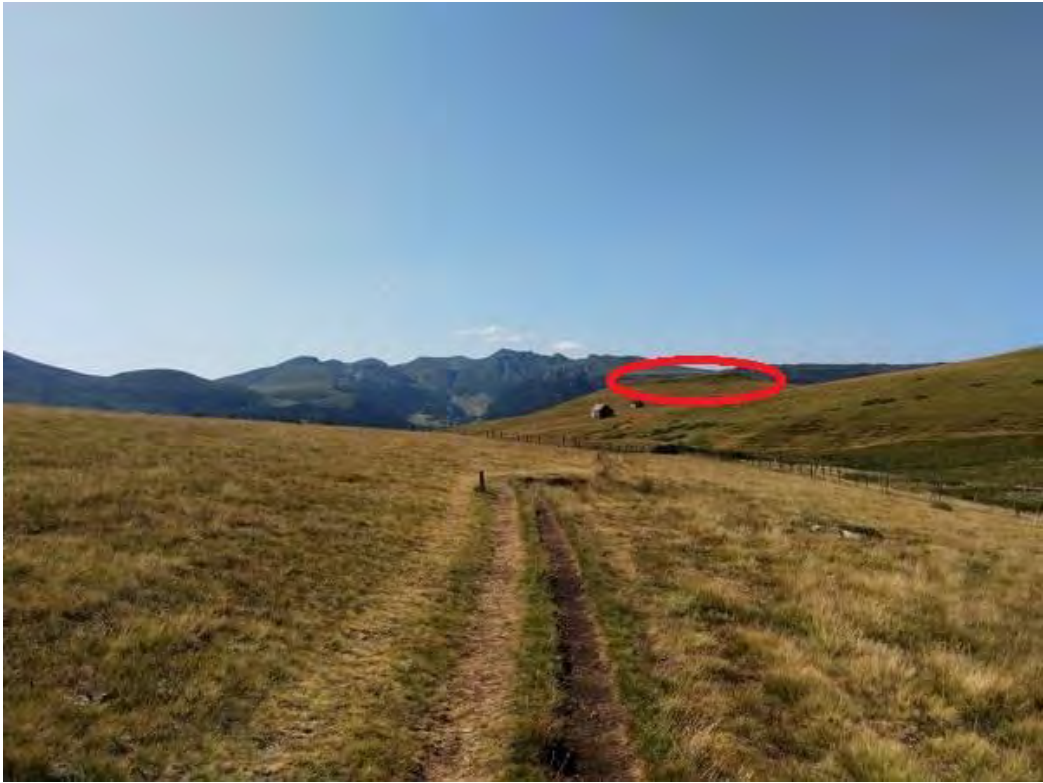

**Technical features of the place :**

The site is extremely exposed to winds and many rocks dot the ground, suggesting that it is difficult to dig. The ground layout of the work will therefore have to be studied carefully. The access is not easy, through fields it is however possible to carry material with a quad or tractor until the burons. Cows are present in summer, which will certainly require closing the work.

**Best point :**

A site with an exceptional 360 degree view of the Massif du Sancy. The presence of 2 burons (one in ruins) adds to the charm of this wild place.

Pic without name and burons seen since the GR30
